SUMMARY

Backend engineer with 2.5 years building **Java** and **Spring Boot** payment services: event-driven flows on **RabbitMQ**, deployed on **Kubernetes**, with on-call ownership and strong testing habits.

EXPERIENCE

Software Developer | Finlytics Pvt Ltd | Jul 2023 – Present

- Built the payment reconciliation flow across 3 **distributed** services; designed retries and idempotency so no payment is ever applied twice.
- Run event-driven pipelines on **RabbitMQ** handling about 50k payment events a day.
- Moved 3 payment services to **Kubernetes** (EKS); wrote the Helm charts and the **Jenkins** deploy pipeline.
- Cut merchant config API latency from ~120 ms to ~15 ms with a **Redis** cache.
- On-call one week a month: added alerts and a runbook, reducing repeat alerts by about 40%.
- Raised payments module test coverage from 45% to 78% with **JUnit** and **Testcontainers** integration tests.
- Review PRs for 2 junior engineers; wrote the design doc for the reconciliation retry flow.

Software Developer Intern | Finlytics Pvt Ltd | Jan 2023 – Jun 2023

- Wrote tests and API documentation for the payments team.

PROJECTS

Real-time chat app | Node.js, WebSockets

- Built a real-time chat app with WebSockets.

SKILLS

- Languages: Java, SQL, JavaScript
- Backend: Spring Boot, REST APIs, RabbitMQ, Redis, MySQL
- Infra: Kubernetes (EKS), Helm, Docker, Jenkins
- Testing: JUnit, Testcontainers, integration testing

EDUCATION

B.E. Computer Engineering | Pune University | 2023 | CGPA 8.1
